

LearningLab

District Admin Feature ■ ■ ■ ■ ■ ■ ■ ■ ■ ■

Personalize your school district's experience in the Indiana Learning Lab by utilizing our free District Admin features, funded by the Indiana Department of Education. With a few clicks, you can send notifications to alert your staff to helpful Lab resources, create private resources and collections for your district, and run reports to track completion.

District Reporting

Resource and collection completion can be tracked by district administrators with a timestamped report listing all district accounts that have completed the learning.

District Content

Upload content, specific to your learners and district, creating a personalized user experience aligned to your unique initiatives and goals. It is private and accessible only by district employees utilizing their school email address within the Lab.

Notifications

Send a message to all staff within your domain to highlight a new resource added to your district content or call attention to a resource within the Lab.

Ready to get started?

Identify which educators at your district should act as your District Admins in the Learning Lab. Let our team know who they are by completing this [Learning Lab District Admin Request form](#).

Encourage your District Admins to complete either of the following training opportunities in the Learning Lab:
